March winds and April showers bring forth May flowers is a short one. The Wikipedia entry on mnemonics states: Academic study of the use of mnemonics has shown their effectiveness. These rhymes will be valuable to teachers and students of chemistry, physics, biology and math. They are also fun reading for scientists and would-be scientists. A short summary of the relevant science is included in front of most of the rhymes. The shortest mnemonic is Human Body Systems Reminder. The body systems are respiratory, skeletal, muscular, endocrine, circulatory, digestive, reproductive, nervous and excretory. The mnemonic rhyme is: Lungs, bones, meat Steroids, heart, eat Sex, fear, excrete. Most of the rhymes give direct information, rather than reminders, in a clever succinct form. Forty rhymes are about physics. Here is a short one about sound waves: Every verbal expression Evokes waves of compression. In chemistry, a lot of elementary concepts are defined plus some help with equations. The longest one in biology is human taxonomy classification. In math Pythagoras theories and trig functions are covered. Long ones in General Science are The Solar System and Thunderstorm Electricity. This is a new and original way to learn some science and math. I m sure you will enjoy it.
