

Preliminary Report Volume 3; V. 5-8 (Paperback)

By California State Mining Bureau

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 edition. Excerpt: .as noted in molding the specimens. 3. Drying shrinkage, expressed in per cent of the volume of the dried material. Note color of dried material and presence of discoloration due to efflorescence of salts. Note also any tendency of the clay to check or crack in drying. 4. Computation of amount of pore and shrinkage water held by the clay in the plastic state. 5. Determination of the weight and character of the granular impurities left on the 40, 80, 120 and 200-mesh sieves. 6. Determination of the transverse strength of dried bars of clay. 7. Volume and porosity changes of the clays when fired to temperatures between 980 and 1300 C, representing intervals of from 20-40 C. Rate of heating to be 30 per hour. 8. Determination of the transverse strength of bars fired below and to the proper maturing temperature and at...

Reviews

The ideal ebook i possibly study. Better then never, though i am quite late in start reading this one. It is extremely difficult to leave it before concluding, once you begin to read the book.
