Date :2011-08-01 version 1. Chang Yun compiled the multi-axis programming and simulation applications (with CD-ROM computer-aided design and manufacturing CAD \ CAM engineering sample series of textbooks). mainly cylindrical cam. blades. impellers. polyhedral parts. composite parts for the milling process instance. to explain the NX programming multi-axis machining. milling machining programming. customization and Vicut post processing machining simulation. Each chapter is a collection of instances of actual programming. process and explain the operation. and in each instance is equipped with the beginning of learning objectives. process and product analysis. then the steps detailed guidance and a wealth of practical skills and techniques to teach the reader how to accurately to do. and with the relevant chapters in key exercises for readers in-depth study. Multi-axis programming and simulation applications (with CD-ROM computer-aided design and manufacturing CAD \ CAM engineering sample series of textbooks). primarily as factories. enterprises engaged in processing. CAD applications. the majority of engineering and technical personnel of the reference book for more axis machining programming and simulation applications. the advanced user. but also for major colleges machinery. tooling. electrical and related professional teacher-student teaching. training and self-use. Contents: Preface Chapter 1 Overview Chapter 2 courses cylindrical cam job description processing program 2.1 2.2 2.3 Cylindrical Cam process planning module into the process to establish the parent group 2.4 2.5 2.6 cylinder cylinder cam cam roughing finishing Chapter 3 leaves description of the processing operations 3.2 3.1 Programming the leaf blade into the processing order processing module 3.3 3.4 3.5 to establish the parent group of rough leaf blade leaf blade finishing 3.6 Chapter 4-axis custom post-processing operations described in 4.2...
