Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. 203 x 133 mm. Language: English . Brand New Book ***** Print on Demand *****.This is a book written by a non-scientist for the non-scientist. It is written so that if you, like many others, find science is frustratingly complicated with graphs, maths and diagrams you will be delighted by this refreshing and easy to read summary of the way in which quantum theory has changed our view of reality forever. You will look anew at the idea of other dimensions, the Big Bang, the human brain and time itself. You may not understand how something can be in two places at once, move faster than light, nor time can go backwards, but you will understand that nobody knows the answer to these questions anyway. Above all you will know what an incredible chapter of history you are living through. It is very clear that the world of physics has come to a crossroads not only between the two competing theories of relativity and quantum theory but also the possibility that we need a completely new direction to look in if we are to make any sense of the new and amazing discoveries, which are now almost daily. In order to put these pieces together we have to start thinking outside the box, mix philosophy with research and experience, and be prepared to think the absurd. I have deliberately decided to look at the issues from a very much taken for granted perspective which is often dismissed as irrelevant, coincidence . It is a concept we could just as easily call probability and as such is at the heart of the most mind boggling theory of our age, quantum theory. However, before the reader can start to make sense of...
